## DITBITS

- ✔ Driver's license
- ✔ Excellent English
- ✔ Basic Swedish
- ✔ Reliable and systematic
- ✘ Likes to demolish stuff
- ✔ Likes to build new stuff
- ✔ Quick laugh reflex

I've always lived between two worlds: The world of computers and internet vs the world of spaces and objects. *Digital vs analog.*

What has always brought these worlds together has been the user experience of the space, object or service. I aim to make a better space not only for the customer experiencing it, but also the employee who maintains it. I strive to always design a balanced space that is not only visually stunning but also effortless to use.

## MOST RELEVANT WORK EXPERIENCE

2012 Dec – 2017 Aug

[Kohtaaminen Ry & Ystävyyden Majatalo Oy](#) - Salo

### GENERAL MANAGER, CEO

I was responsible for designing, budgeting and organizing the renovation and maintenance of a 1600m<sup>2</sup> estate from 1928. This included bookkeeping and financial management.

I designed, developed and maintained the organization's website as well as the internal documentation and guidelines for house staff.

I was responsible for training staff and volunteers at the inn and organized their everyday work schedules in various maintenance and customer service projects.

I ran the customer service, handled offers and coordinated course activities with course instructors and staff.

2007 Apr – 2012 Jan

[e21 Solutions Oy](#) - Helsinki

### LEAD UI DESIGNER

My main responsibility was the user experience of our core product SOLU Business Solution, a CMS for managing product information for the construction industry. I coordinated the development of SOLU together with the product technical lead. Together we directed the efforts of our small team of designers, front-end and back-end developers.

The target group for SOLU was the Finnish construction industry. SOLU was built into the customers' public-facing websites, most of which I also designed. My touch can still be seen e.g. on the [Isover](#), [Gyproc](#) and [Rudus](#) websites. I also designed, budgeted and led the renovation of the company lobby and office space.

## SKILL SET

### DESIGN

Photoshop  
Illustrator  
UI/UX design
